

PROJECT LEAD THE WAY

**PLTW**

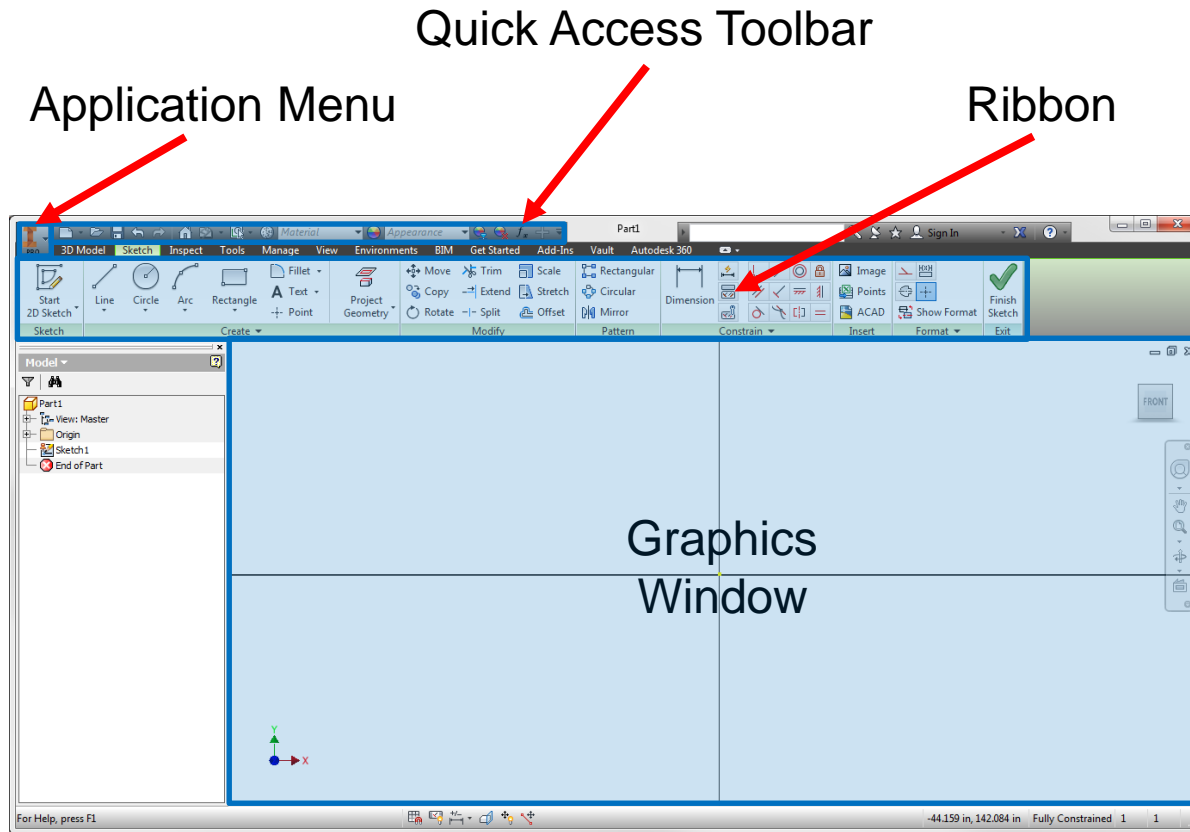

# **3D Computer Modeling Using Inventor™**

# Getting Started with Inventor

When you first open Inventor, you have the option to begin a new part, assembly, or drawing. Recently used items are available to open below. You can also open or start new files using the ribbon at the top of the window. When starting a new file, be sure to configure the template for the correct system, either English or Metric.

# Inventor Screen Layout

## Application Menu

- Contains common commands for creating, saving, and printing.

## Quick Access Toolbar

- Provides quick access to frequently used commands

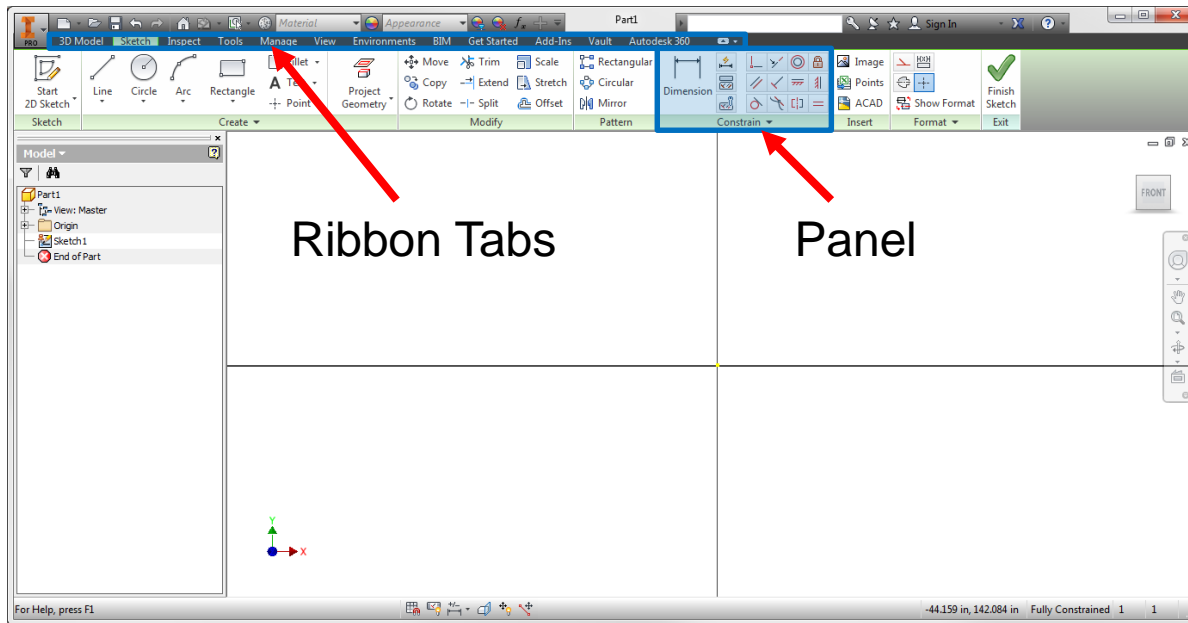

## Ribbon

- A palette that displays buttons and controls used for both 2D drawing and annotation and 3D modeling and viewing

## Graphics Window

- The active modeling area where parts and assemblies are created and edited

# Inventor Screen Layout

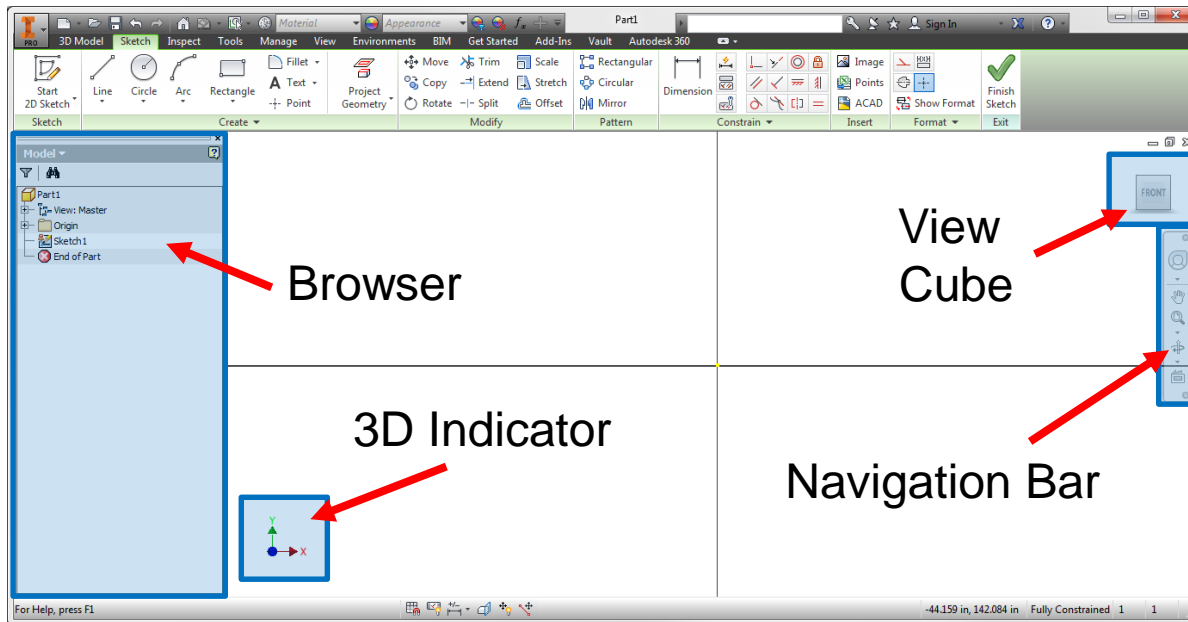

## Ribbon Tabs

- Organized by task, contain task specific buttons and controls

## Panel

- Categorized tasks with quick access to commonly used tasks and an expandable menu for additional related options

# Inventor Screen Layout

## View Cube

- Clickable and draggable interface that is used to switch between standard and isometric views

## Navigation Bar

- On screen element that provides access to various navigation tools

## Browser

- Maintains history of part, assembly, or drawing creation

## 3D Indicator

- Shows direction of X, Y, and Z coordinates.
- Red represents X,
- Green represents Y
- Blue represents Z directions

# Mouse Buttons

- **Left Mouse Button**
  - Used to select icons, menus, and graphics
- **Right Mouse Button**
  - Brings up additional options
  - Accepts default option
  - Ends a process
- **Middle Button/Wheel**
  - Provides quick pan and zoom functions

# Geometric Constraints

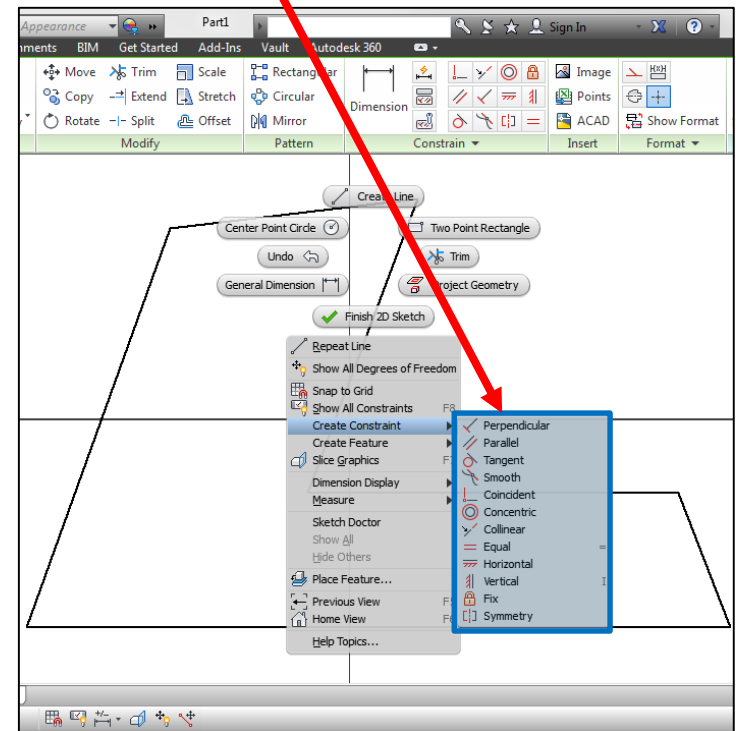

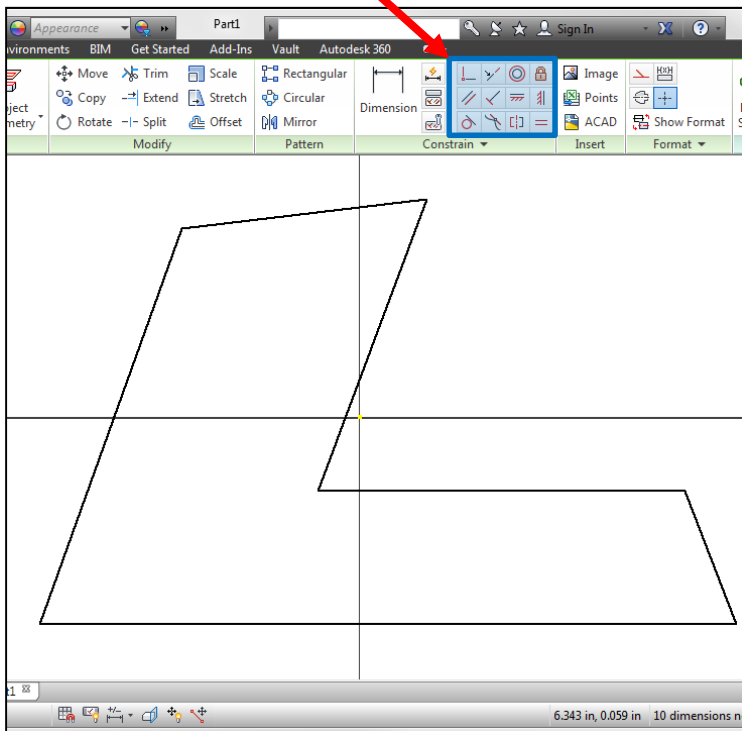

Symbols that show alignments to capture the design intent

To use Geometric Constraints:

1. Use the commands available from the Constrain panel

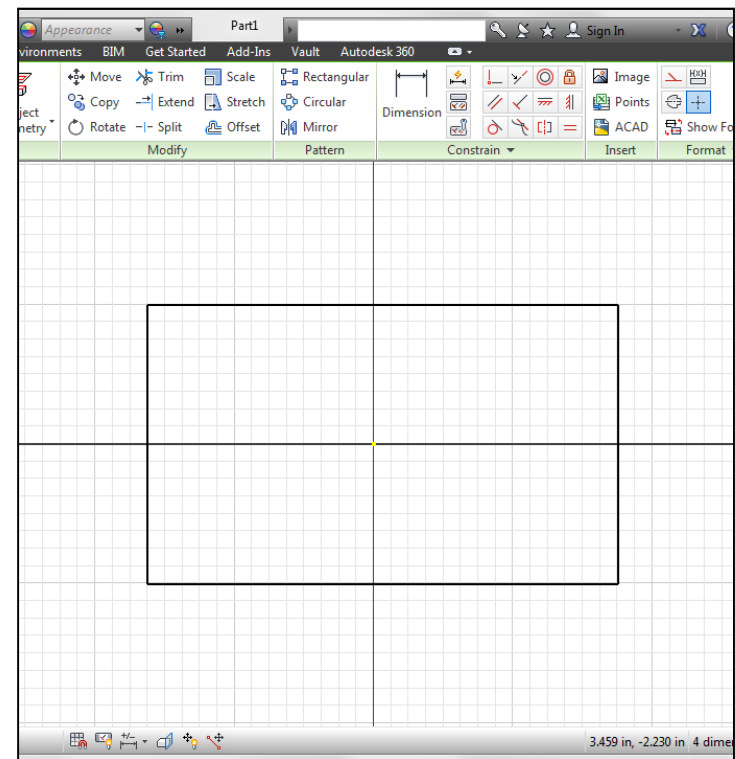

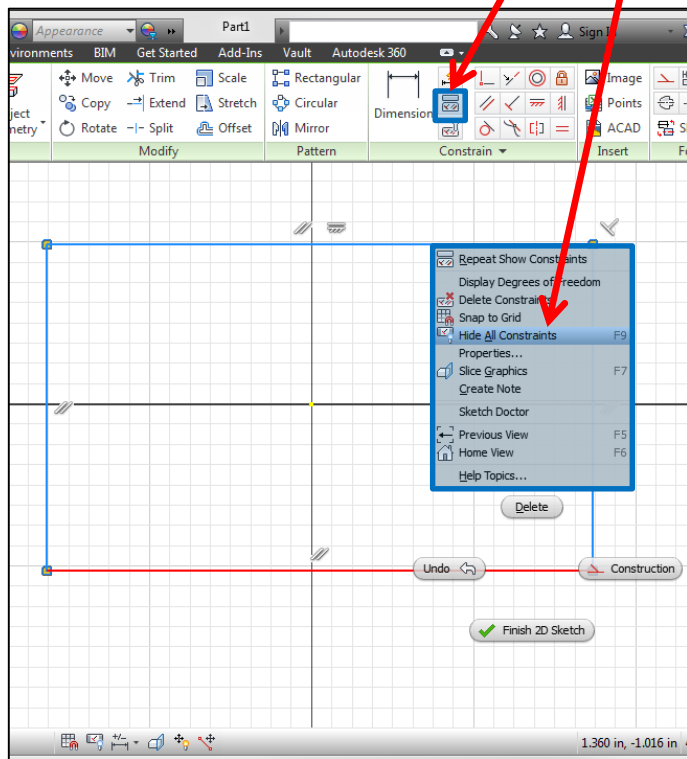

2. Right mouse click in Graphics Window, then select Create Constraint

OR

# Show and Hide Constraints

Constraints can be shown or hidden using the Show Constraints button in the Constrain panel, using the menu by right clicking in Graphics Window, or the F9 key

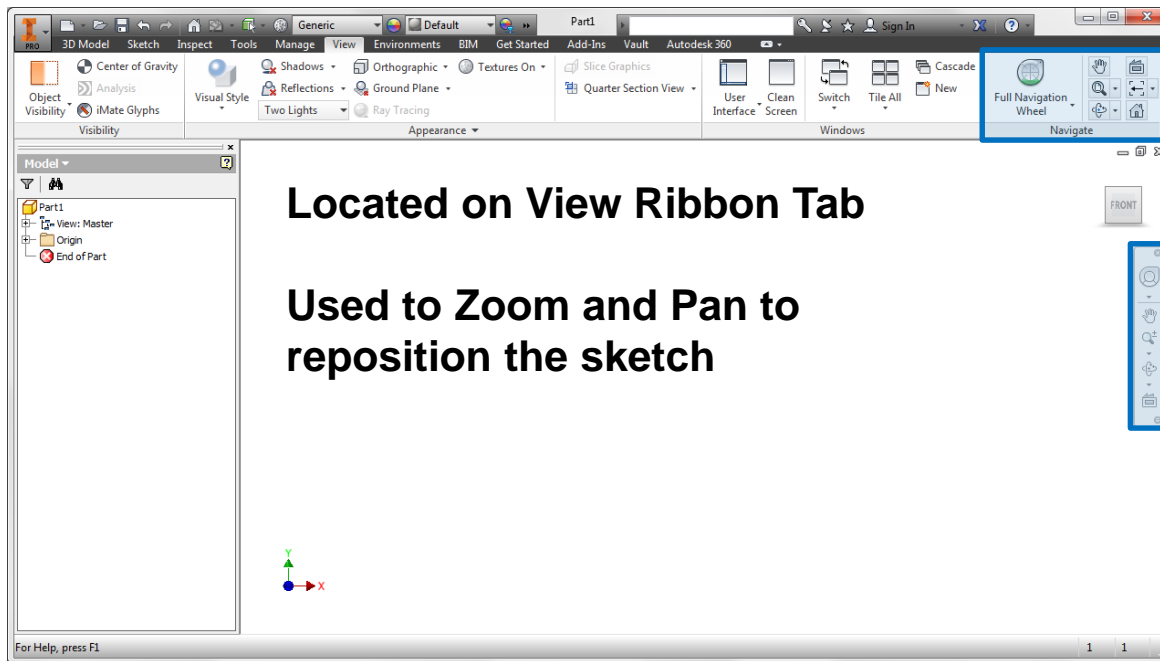

# Geometric Constraint Symbols

	Perpendicular	Lines are at right angles
	Parallel	Line is parallel to other objects
	Tangent	Touches at one point only
	Smooth	Create a continuous curve
	Coincident	Constrains 2 points or point to curve
	Concentric	Arc or Circle shares center point
	Collinear	2 lines lie along the same line
	Equal	Resizes to same radius or length
	Horizontal	Line is parallel to X axis
	Vertical	Line is parallel to Y axis
	Fix	Points or curves stay locked in place
	Symmetry	Objects align symmetrically about a line

# Dynamic Viewing Functions

**Located on View Ribbon Tab**

**Used to Zoom and Pan to reposition the sketch**

# Shared Sketches

**Shared sketch**

**Consumed in  
multiple  
features**

# Precise Input

- The Precise Input toolbar is added by expanding the Create panel and selecting Precise Input
- Create the shapes that you labeled in Activity 1.5.1 The Coordinate System and Descriptive Geometry.
